PROFILE

I'm a passionate full-stack JavaScript web developer with expertise in React, Node.js, Next.js, MongoDB, and Express. I enjoy building dynamic, user-friendly applications that solve real-world problems.

WORK HISTORY

GetProsperi, CapeTown, SA @STUDIO VENTURIS (<https://getprosperi.com>)
Oct 2024 – Jan 2025

Position: Lead Developer

- Built an online dashboard for shop owners with (inventory and customer management).
- Delivered training in Supabase, Firebase, and React to Junior Developers.
- High involvement with Product Manager from product design, to performance iterations.

CarryCome, CapeTown, SA @STUDIO VENTURIES (<https://carrycometrip.com>)
Aug 2024 – Oct 2024

Position: Full Stack Developer

- Develop both backend (Node.js) and frontend (React) components.
- Collaborate closely with the Product Manager and UI/UX Designer to deliver complete features from start to finish.
- Maintain a balance between writing robust, tested code and quickly iterating to meet deadlines.
- Handled Mailchimp newsletter subscription using a Netlify function.
- Wrote a bunch of Firebase functions to send welcome emails, broadcast notifications, fetch existing users from Firebase and sync them to Mailchimp for newsletter subscription.

POWERLABS, Uyo, Nigeria (<https://powerlabsenergy.com>)
July 2024 - Aug 2024

Position: Freelancer

- I built the user-facing site for a solar company website from scratch using React, and TailwindCSS for styling.

CEDEN Nigeria, Lagos, Nigeria (REMOTE WORK) (<https://cedennaija.org>)

May 2024 - June 2024

Position: Freelancer

- I built the user-facing site for a multi-sector investment organization from scratch using React, and TailwindCSS for styling.

Usepays, Lagos, Nigeria (REMOTE WORK) @ CARGLE (<https://usepays.co>)

Jan 2024 - Apr 2024

Position: Frontend Developer

- I developed a top-up with cash and airtime platform with authentication, and payment integration via flutterwave.
- I worked closely with the Node.js engineer to integrate voucher recharge, and payment related APIs. The voucher platform was built using React.
- Actively participated in code reviews and better code quality.

Unizonn, Uyo, Nigeria @SOFROSYNLABS (<https://unizonn.com>)

Aug 2023 - Jan 2024

Position: Originally Frontend Developer before Tinkering with Amazon

- I worked closely with the Nest.js developers to integrate article, and post related APIs with real-time notifications. The social media platform was built using Next.js.
- Involved in both frontend (Next.js, TypeScript) and Backend (Amazon, and PostgreSQL setup).
- Onboarded and reviewed code for Frontend developers.
